

Assembling a Patchwork Quilt:

Press backing and quilt top to make a sandwich as shown.

Press the air out carefully to iron out any creases.

Use fabric temporary adhesive between the layers if desired OR pin carefully OR tack lines of temporary stitches to hold the layers together.

Quilt the sandwich through all layers, by hand or machine.

A walking foot is a very useful tool to help when sewing through more than 2 layers as in the case of a quilt.

The walking foot will help to avoid creases or tucks in the quilt top or backing.
